

# Build It Green Training

Learn how to design & build healthier, higher quality green homes!

Schedule

## Certified Green Building Professional & Designing & Building Green Energy Efficient Homes

*The California New Homes Program from Southern California Edison is proud to support Build It Green. Through these training classes the construction industry is learning valuable tools to keep California leading the way in energy efficiency and sustainable building.*

*-John Morton, Southern California Edison*

**Learn how to take advantage of the \$50+ million in utility incentives approved for 2010, the AB811 finance districts forming statewide, and the \$100 million in stimulus funding.**

*The City of Fullerton's Green Building Initiative Program is launching a comprehensive consumer outreach program. Fullerton is promoting the Build It Green Training as part of the outreach program in support of the overall goal to increase knowledge about building green and energy efficient homes. I highly recommend to anyone interested in transitioning to a new career or expanding their existing skill set to obtain Build It Green's Certified Green Building Professional and Designing & Building Green Energy Efficient Homes Training certifications.*

*-Hadi Tabatabaee, City of Fullerton*

### Certified Green Building Professional Training

*Position yourself for success in the green building market*

- Learn the fundamentals of designing, building and marketing higher quality homes that are healthier and more energy, water and resource efficient
- Learn how to market the benefits of green building to your customers
- Receive tools and resources to implement green building practices
- Get listed in the *Certified Green Building Professional Directory*

\*\*This is the prerequisite course for all other Build It Green professional trainings.

### Designing & Building Green Energy Efficient Homes- Advanced CGBP Training

*Get trained now to design and build high quality green homes*

- Learn step-by-step strategies to effectively design new homes or upgrade and remodel existing homes, using a whole house evaluation
- Walk through a comprehensive green home analysis focusing on energy and water efficiency and improved indoor air quality
- Understand building integrity & energy performance testing, efficient hot water systems, mechanical ventilation, insulation, weatherization, moisture management and *EPA's New Indoor airPLUS program*

\*\*You must have completed Certified Green Building Professional Training (CGBP) or equivalent. Course fulfills CGBP recertification requirements.
