ICC Orange Empire Chapter and City of Tustin

Presents
Existing Buildings
And the 2010 CBC

Existing Building Workshop:

This class will focus on the use of the existing building stock and the challenges facing the property owners, architects and building departments. Because of the major changes in the CBC, from the use of the UBC to the IBC, there are many potential issues that must be solved.

Chuck Daleo will present real-life problems his consulting practice has discovered. Paul Armstrong will lead discussions on how to solve the issues when a change of occupancy occurs. Both will address fire/life safety concerns and the absolute Code requirements as well as when an "exception" is acceptable. Henry Huang will address new structural provisions and Charles Russell will present the application of CAL-Green and Energy Codes when an improvement such as a TI is proposed.

This course is recommended for both plan checkers, building inspectors, and design professionals. The course starts at 1:00pm and will conclude at 5:00pm. Each class participant will earn 0.4 CEU's for attending the seminar. Class registration will begin at 12:30 pm

- Instructors:** Chuck Daleo, Paul Armstrong, Henry Huang and Charles Russell
