Looking at the Photovoltaic System Based on the 2008 NEC

Inspectors And Contractors Are Invited To Presentation On The Requirements For Inspecting And Installing PV Systems

When: Thursday, November 10, 2011

Location: Irvine Civic Center
Conference/Training Center
1 Civic Center Plaza
Irvine, CA 92606

Time: 7:30 a.m. Breakfast/Networking
8:00 a.m. — 12:00 p.m. Seminar
Complimentary Breakfast Provided

The City of Irvine, the Orange Empire Chapter of the International Code Council, and the Orange County Chapter of the National Electrical Contractors Association would like to invite local inspectors and contractors to attend a seminar that will include an in-depth focus on Article 690 of the NEC and requirements for inspecting and installing photovoltaic systems. This course will review photovoltaic systems from the array to the inverters including connection to the service, maximum system voltage, conductor selection, ampacity calculations, overcurrent protection, disconnect requirements and equipment labeling.

- Detailed look at Article 690 of the 2008 NEC
- Attendance for entire seminar qualifies for .35 CEUs
- Seminar will focus on residential PV installations

Instructor:

- Chuck Bailey, Senior Building Inspector, City of Irvine

Chuck Bailey currently works for the City of Irvine as an electrical inspector. His background includes 22 years as inspector and in electrical plan review. Prior to becoming an inspector, Chuck was a IBEW journeyman electrician for 20 years and has experience working across industrial, commercial, and residential applications. He has taught a number of training courses on PV installations and code and standards at the Orange County Electrical Training Center.
