## The Orange County Division - Serving the Public Servant

*Dedicated to protecting local control and promoting good governance and policy making among Orange County's elected officials.*

---

The purpose of the Orange County Division, League of California Cities is to serve and represent its members by providing education, information, legislative and advocacy services.

The Division acts as an information clearing house for current issues through its website, publications, regular meetings, committee work and partnerships with other agencies.

### Strategic Goals:

- **Protect Local Control and Promote Sound Public Policy.**
- **Assert Orange County Cities' Influence on State and Local Regulatory Agencies.**
- **Provide the Premier Information Clearinghouse for Orange County Cities.**
- **Partner and Collaborate with Government Agencies, Private Industry and Academia.**
- **Enhance Effective Elected Leadership in Orange County.**

---

The Division is a proactive advocate for "smart" governance and a resource for its member cities as they continue to develop best practices in public policy.

It is this dedication to its members that drove Division membership to contribute over 1,900 hours of volunteer service to the organization in 2009.

Join us! Whether you represent a public agency, a private business or a non-profit in Southern California, the Orange County Division is the venue to collaborate and contribute to strong public policy in this region's local governments.

October 21, 2010  
ICCOEC / SCFPO Joint Annual Meeting  
**Good Intentions - Unintended Consequences**  
Lacy Kelly, Executive Director, Orange County League of Cities

Introducing the Orange County Division, League of California Cities  
Update on the State Budget  
Economic woes for cities  
Bell - How does Orange County compare  
Elections update

**Good Intentions - Unintended Consequences**

Most government bodies - state, regional and local have some type of regulatory role

The recession and housing downturn have taught us...the success of the business IS the success of cities (and all other public agencies)

The more we "Do No Harm," the sooner the economy will bounce back

Regulatory relief:

- Permits
- Fees
- Time (Is literally money)

Agencies have the power to stimulate the economy

One Orange County resident's story ▷

New ways of doing business:

- Model Landscape Irrigation Ordinance
- OCFA - Fire Maps
- Siting of cell towers
- Breaking Down Barriers (OCTA)
- Fee holidays

Connecting the dots between regulations and jobs

Collaborating with stakeholders

If we don't lead, our constituents will eventually take charge

Contemplate the initiatives we have to codify/regulate - then ask...

***Are our Good Intentions Causing Unintended Consequences?***
